Statistics Development Design Data Architecture Leadership

As a data science manager for Deloitte Digital's Social Intelligence practice, I push the envelope in the application of social data. My experience includes 8 years of social data analysis, across a wide range of domains. I provide a holistic perspective to the data though my background in statistics, development, and graphic design. I am passionate about transforming data into understanding in a way that excites and enriches.

I am seeking opportunities that challenge me, support my personal growth, and allow me to make an impact on the world. I bring insights to life in code, statistics, and presentation, and I love my work.

Skills Used
Over Time:

Roles & Responsibilities:
